Eloctate 2000IU Supply Update

Customer Letter # 2022-17

2022-07-13

Dear Colleagues:

Canadian Blood Services has been notified by the manufacturer of a potential supply interruption for Eloctate 2000IU in the coming weeks. Although the overall supply of Eloctate is sufficient, there may be a need for patients to be switched to alternative vial sizes. As health care providers switch their patients, there may be an ongoing need to adjust vial sizes as alternative vial sizes may be impacted by a higher than usual demand.

This is a dynamic situation and Canadian Blood Services is working closely with the manufacturer to mitigate potential impacts.

Please share a copy of this customer letter with healthcare professionals at your hospital who might be interested in this information.

This customer letter can also be viewed at www.blood.ca in the "Hospitals Services" section. If you have questions about this letter, or if you require it in an accessible format, please contact your local hospital liaison specialist.

Sincerely,

Sylvain Grenier
Director, Plasma Protein and Related Products Formulary Program
